CORE COMPETENCIES

DIFFERENTIATORS:

Marieke's combination of service offerings enhances efficiency by streamlining processes, reducing redundancy, and leveraging automation for optimized performance.

Software & Systems Engineering

We deliver Agile PM and SDLC support—from sprint planning and CI/CD to UI/UX, development, testing, release management, and help desk. Our infrastructure services span cloud, on-prem, and DevSecOps. We drive modernization/transformation through automation, low-code, open source, mobility, & IT strategic planning.

Business & Financial Management

We provide forecasting, budgeting, payroll, and financial system support, leveraging federal tools like Delphi, PRISM, and E2. Our services include strategic planning, risk management, scheduling, resource optimization, and AI-driven automation for digital transformation.

Data Integration & Insights

We provide data management services, including big data modeling, integration, security, and governance—plus analytics for trends, risk, and predictive insights. Our advanced solutions include Artificial Intelligence (AI) Machine Learning (ML), data engineering/ETL, data warehousing, and real-time processing.

PAST PERFORMANCE

FAA Financial Tracking System

Agency: Federal Aviation Administration, Capital Budgets
Contract #: DTFAWA10A-00136 / 693KA9-21-F-00168
Contract Value: \$10,296,988 **PoP:** July 2021 – January 2026

REGIS tracks cuffling data and reconciles with the official financial system, Delphi. Marieke manages the full lifecycle including requirements, design, development, testing, training, help desk and infrastructure/operations.
